EDGE TYPES	P	

C92 KOPAS LIMITED RUN

In 2005 Spyderco released an ongoing series of dressy folding knives we call our Kopa Series. The series offers the same pattern gent's folder with a different handle material inlay, four times per year. Production of each handle material is limited to 600 pieces. Kopa's stainless handles come inlaid with unique and often exotic materials. They are bioengineered to fit the hand with expansion points holding the palm in contact with the handle. Both stylish and utilitarian, the leaf shaped blades feature a spine cusp, mid-positioned back lock and silhouette, low profile, steel pocket carry clip.

- ✿ Flat-ground Blade
- ✿ David Boye Dent
- ✿ Right hand tip-down carry

Prices vary with different model handle materials.

All models are available in limited quantities.

Contact your Spyderco representative for availability.
