BLADE STEEL	VG-10	
WEIGHT	4.9oz	139g
EDGE TYPES	P, S	

### C07G POLICE3

A lot can change in twenty-four years, yet sometimes it's comforting how things stay unchanged. When released in 1984 the Police Model was all about efficiency with a large as possible blade built into a thin, equal sized handle. It still is. Mid-year 2008 we're introducing an additional version, The Police3. Everything that makes the classic an icon is there but with a G-10 handle, full flat ground blade, David Boye Dent and a 4-way tip-up/tip-down and left- or right-handed clip.

- ✿ 4-way clip
- ✿ David Boye Dent
- ✿ Weight reducing spine swedge
- ✿ Spine and finger-choil jimping
- ✿ Screw together construction
- ✿ G-10 laminate handle scales
- ✿ Flat-ground blade
- ✿ Full skeletonized liners

## C116 SUPERHAWK

Hawkbill blades arc sharply to a fine cutting tip. This shape is perfect for downward, pulling cuts and has a near cult-following by virtue of its memorable profile. Hawkbillers demanded, we offered up, for the first time a large Hawkbill with exotic handle material for the higher-end connoisseur. The SuperHawk's peel ply carbon fiber handle is ultra light with a woven texture that sticks to the palm. A large hook at the rear of the handle prevents the knife from slipping in the hand during pulling cuts. VG-10 steel blade elevates style and performance to a higher plane with a full flat-ground blade in a PlainEdge. Pocket friendly left/right-hand wire clip carries deeply while being easy on fabric

- ✿ Left/right-hand tip-up silhouette wire pocket clip
- ✿ Compression Lock®
- ✿ Screw together construction
- ✿ Spine and finger-choil jimping
- ✿ Flat-ground blade
- ✿ Full skeletonized liners

## C123 SAGE

A Sage is a person wise in judgment and experience who achieves the title through trial by extending their best effort at every opportunity. Applied to something tangible, it would be an item created from experience and striving for quality and performance at the highest level. If said item were a pocketknife we could call it a Sage and it represents Spyderco's 30-year pledge to knife crafting and making better knives at every opportunity. The Sage will be a repetitive series of folders each with a different locking device or mechanism. Sage-1 recognizes knifemaker Michael Walker's invention of the LinerLock® and ball bearing detent method of locking (open and closed) a folding knife. Spear-point CPM-S30V blade is flat-ground. Handle is twill-woven carbon fiber vibrant with multilayered weaving that runs deep, making ridges and textures for the gripping.

- ✿ Left/right-hand silhouette deep-pocket wire clip
- ✿ Nested LinerLock®
- ✿ Spine and finger-choil jimping
- ✿ Flat-ground blade
- ✿ Full skeletonized liners

#### C126 ROCK LOBSTER BY JENS ANSO

Who exactly is Jens Anso? He's young, late 20s. He's a talented Danish industrial designer. He's an up-and-coming knifemaker shaking up the industry who once said "If you don't want to make your second knife, don't make the first." We're thankful he's drawn to knifemaking because his designs are wildly unique, fun and functional, and making noise in the knife world. His Rock Lobster collaboration has a blade shape not defined by traditional knifemaker labels. Part Wharncliffe part knobby nosed, its thick tip eats up hard cuts and offers loads of personality. Foliage green G-10 slip-stop handle.

- ☀ Tip-up/down right hand clip
- ☀ Screw together construction
- ☀ Nested LinerLock®
- ☀ G10 Laminate handle scales
- ☀ Full flat-ground blade
- ☀ Nested and skeletonized liners

#### C127POR URBAN ORANGE WHARNCLIFFE C127FG URBAN FOLIAGE GREEN

Laws and guidelines for carrying pocketknives are changing in many parts of our world. Several countries applied restrictions and parameters on folding knives that have blades which lock open. Spyderco addresses this by developing a series of non-locking folders we call SLIPITS. SLIPITS are traditional Spyderco CLIPITS but with non-locking blades. The blade is held open by a notched or slip-joint at the knife's pivot. Closing the blade, the notch produces resistance, functionally similar to traditional slip-joint penknives. Heightening control and safety, a deep finger choil positions the index finger behind the blade directly under the thumb. You can choke up nearer the cutting edge with comfort and dexterity and this positions the index finger in the choil for added safety against the blade closing while cutting. Two new Urban SLIPITS both feature G-10 handles. C127OR Wharncliffe model is only available with orange handle, C127FG Leaf-shaped blade is available with foliage green handle.

- ☀ Left/right-hand silhouette deep-pocket wire clip.
- ☀ Screw together construction
- ☀ Spine and finger-choil jimping
- ☀ Flat-ground blade [Wharncliffe or Leaf-shaped]

### C41CFP NATIVE4

The Spyderco Native Model has taken on a notable life. Starting out as a folder engineered for the human hand, that remains key but the model continues evolving with newer materials and blade steels. The new Native4 is all about ergonomics like its predecessor but comes with a carbon fiber handle. What positions the Native as a winner in ergonomic measurement is its two finger indents. The first, closest to the blade, positions the index finger for choking up and controlling the cutting edge. The second indent holds the middle section of your hand on the handle so it cuts like a high-performance sports car - smooth, controlled, effortlessly.

- ✿ 4-way clip
- ✿ Weight reducing spine swedge-grind
- ✿ Spine and finger-choil jimping
- ✿ Spear-point flat-ground blade
- ✿ Full skeletonized liners

### C10BBK ENDURA LIGHTWEIGHT BLACK BLADE C11BBK DELICA LIGHTWEIGHT BLACK BLADE

- ✿ Phosphor bronze bushings
- ✿ FRN Bi-Directional Textured™ Handle
- ✿ David Boye Dent
- ✿ Enlarged opening hole
- ✿ Spine Jimping
- ✿ Flat saber-ground blade

## 307 SLIPSTONE

308 CERAMIC  
GOLDEN STONE

## 307 SLIP STONE

Slip-shaped stones are great for sharpening curved blades, woodworking tools, plane irons and sophisticated shaped edges. Teardrop shaped they hone flat, concave, convex edges and bring slant-edge and straight chisels to their sharpened best. Fine grit ceramic stone is flat and ultra smooth for professional finishing and sharpening, tightening and smoothing the cutting edge's scratch pattern for an even keener, hair popping edge. Lightweight for hand held use, taking the sharpening surface directly to larger items. We recommend when tabletop sharpening, laying the stone on top of it's suede carrying case for slip free use. To clean: Wash in fresh water and scrub with powdered abrasive cleaner and a scouring pad. Rinse and dry.

## 308 CERAMIC GOLDEN STONE

Shaped with curves and angles for sharpening any edge. U.S.A. made fine grit Alumina Ceramic is closed-cell and doesn't wear with usage or time. Fine stones excel at polishing and professionally finishing edges. The stone has fine grit sharpening surfaces including: a flat stone and a groove for de-burring and honing pointed objects. Holding the stone vertically on a tabletop and tilting it from one side to the other raises one edge off the tabletop, creating a 20° angle (40° total angle) for sharpening knife blades. Both sides are elliptical. One side has a large radius for sharpening PlainEdges, the other a smaller radius for SpyderEdges (serrations). Positioned on its' side horizontally creates a 12.5° angle designed for scissor sharpening. Suede leather carry case doubles as a non-skid counter top pad for tabletop sharpening. To clean: wash stone in fresh water, scrub away steel particles using powdered abrasive cleanser and a scouring pad. Rinse and dry. Temperature resistant, dishwasher and autoclave safe.

## IMPORTANT LEGAL NOTICE

Automatic knives can only legally be purchased, owned and/or possessed, if at all, subject to the laws of your state and of the United States. Purchasing and/or possessing an automatic knife may subject you to criminal liability. To legally purchase and/or possess an automatic knife, you must fall into one of the categories of purchasers/possessors outlined in the statutory language of 18 U.S.C. Section 1716(g)(2)(1-4) and 15 U.S.C. Section 1244(2-4) below. You must also be in compliance with any local and state laws, statutes, and regulations related to the purchase and possession of automatic knives.

### 15 United States Code Section 1241, et. seq. - The Federal Switchblade Act states:

#### § 1241. Definitions

As used in this Act—

- (a) The term "interstate commerce" means commerce between any State, Territory, possession of the United States, or the District of Columbia, and any place outside thereof.
- (b) The term "switchblade knife" means any knife having a blade which opens automatically—
- (1) by hand pressure applied to a button or other device in the handle of the knife, or
  - (2) by operation of inertia, gravity, or both.

#### § 1242. Introduction, manufacture for introduction, transportation or distribution in interstate commerce; penalty

Whoever knowingly introduces, or manufactures for introduction, into interstate commerce, or transports or distributes in interstate commerce, any switchblade knife, shall be fined not more than \$ 2,000 or imprisoned not more than five years, or both.

#### § 1243. Manufacture, sale, or possession within specific jurisdictions; penalty

Whoever, within any Territory or possession of the United States, within Indian country (as defined in section 1151 of title 18 of the United States Code), or within the special maritime and territorial jurisdiction of the United States (as defined in section 7 of title 18 of the United States Code), manufactures, sells, or possesses any switchblade knife, shall be fined not more than \$2,000 or imprisoned not more than five years, or both.

#### § 1244. Exceptions

Sections [1242 and 1243] of this Act shall not apply to—

- (1) any common carrier, with respect to any switchblade knife shipped, transported, or delivered for shipment in interstate commerce in the ordinary course of business;
- (2) the manufacture, sale, transportation, distribution, possession, or introduction into interstate commerce, of switchblade knives pursuant to contract with the Armed Forces;
- (3) the Armed Forces or any member or employee thereof acting in the performance of his duty; or
- (4) the possession, and transportation upon his person, of any switchblade knife with a blade three inches or less in length by any individual who has only one arm.

### 18 United States Code, Section 1716 relevantly states:

- (g) All knives having a blade which opens automatically (1) by hand pressure applied to a button or other device in the handle of the knife, or (2) by operation of inertia, gravity, or both, are nonmailable and shall not be deposited in or carried by the mails or delivered by any officer or employee of the Postal Service. Such knives may be conveyed in the mails, under such regulations, as the Postal Service shall prescribe—
- (1) to civilian or Armed Forces supply or procurement officers and employees of the Federal Government ordering, procuring, or purchasing such knives in connection with the activities of the Federal Government;
  - (2) to supply or procurement officers of the National Guard, the Air National Guard, or militia of a State ordering, procuring, or purchasing such knives in connection with the activities of such organizations;
  - (3) to supply or procurement officers or employees of any State, or any political subdivision of a State or Territory, ordering, procuring, or purchasing such knives in connection with the activities of such government; and
  - (4) to manufacturers of such knives or bona fide dealers therein in connection with any shipment made pursuant to an order from any person designated in paragraphs (1), (2), and (3).

#### WARRANTY AND REPAIR GUIDELINES FOR RESTRICTED ITEMS:

Should any restricted item need to be returned to Spyderco, Inc. for Warranty and/or Repair, the item MUST be accompanied by a Restricted Item Return Form. This required form indicates that the owner of the knife personally attests that they are allowed to legally possess the restricted item being returned for Warranty and/or Repair. There will be no work performed on the item until this form is received by Spyderco, Inc. If unable or unwilling to complete the appropriate documentation, the knife will not be returned or refunded under any circumstances - NO EXCEPTIONS.

This form is included with each restricted item shipped from Spyderco, Inc. If you do not have a form, please see our website at [www.spyderco.com](http://www.spyderco.com) to download the form or contact our Warranty and Repair Department at 800-525-7770 or 303-279-8383.

### B02 SMALLFLY

Our SmallFly takes traditional butterfly knife elements, weaving them with innovative Spyderco features- Spyderizing it. MIM (metal injection molded) aluminum handles are elongated modifying the Fly's center of balance over traditional butterfly knives. Adding handle length creates momentum and equilibrium when swinging and manipulating. Wire pocket clip and spring-loaded locking latch attach to either handle for left-or right-hand carry. 154CM stainless blade has a centerline-grind dispersing blade weight equally complementing balance and symmetry.

- ☀ 4-way positioned tip-up clip
- ☀ Screw together construction
- ☀ Spring loaded latch locks blade closed
- ☀ Blade is flat-saber ground with a non-sharpened swedge.
- ☀ Weight reducing swedge-grind at the spine
- ☀ Made in Golden, Colorado U.S.A.

### B02TR SMALLFLY G-10 TRAINER

Equal in weight, size and balance as a live SmallFly G-10. Designed for training and practice the red G-10 handle denotes it a Fly Trainer with no sharp cutting edge.

- ☀ 4-way positioned tip-up clip
- ☀ Screw together construction
- ☀ Spring loaded latch locks blade closed
- ☀ Made in Golden, Colorado U.S.A.

### B03 SZABOFLY

Laci Szabo's stylized butterfly has apparent Spyderco's influence in the handle's round holes for retention and control over the knife while rotating and swinging. His personal style is reflected in the curved handle and blade, which curl into each other when the knife is closed. Szabo's trademark sickle/scythe shape applies cutting performance in a forward cut and curved spine works well for trapping and passing. PlainEdged VG-10 blade.

- ☼ Dual-position wire pocket clip fastens to either handle-section on either side of handle
- ☼ Screw together construction
- ☼ Spring loaded latch locks blade closed
- ☼ Blade is flat-saber ground with a non-sharpened swedge
- ☼ Chamfered pinch-free handle
- ☼ Made in Golden, Colorado U.S.A.
